

LUBRICATION SOLUTIONS

FOOD PROCESSING | MANUFACTURING | GENERAL INDUSTRY

Why choose Hydrotex as your Lubrication Solution Partner?

We believe that great performing products are only one part of developing and sustaining a superior lubrication program. Lubrication accounts for one of the lowest spends in a plant's MRO budget, yet done incorrectly can cost you tens of thousands of dollars in repairs and unscheduled downtime.

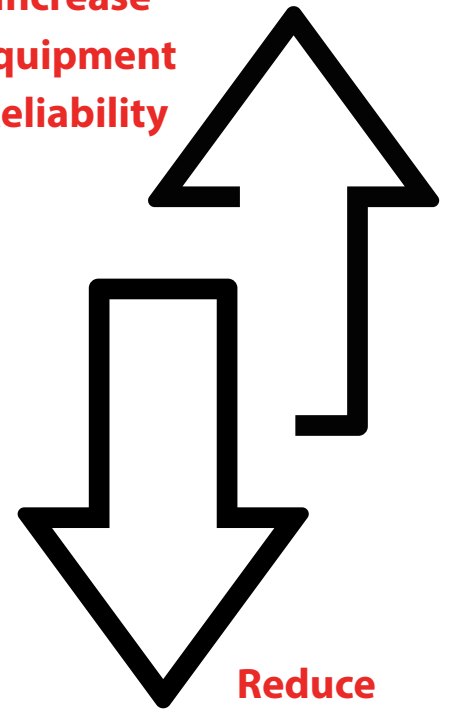

What is the Value of having Hydrotex as your Lubrication Solution Partner?

Our goal is to help you reduce maintenance costs, extend the life of your equipment, improve uptime performance and contribute to creating a safer work environment for your products and your people.

How does Hydrotex help You?

Hydrotex can provide more than safe products engineered to perform in your demanding environment. We can provide education for you and your team on lubricants and lubrication, help with critical equipment surveys, lubricant handling and storage and lubrication strategy. Hydrotex partners with other leaders in the field to help you make incremental improvements in your program that are measurable and sustainable over time.

**Increase
Equipment
Reliability**

**Reduce
Unscheduled
Downtime**

Ask your Hydrotex Representative how a Lubrication Partnership can keep your equipment running and guarantee you the lowest annual cost of sustainable lubrication.

HYDROTEX PERFORMANCE PRODUCTS

GEAR OIL

- SYN-Nth Gear Oil protects severely loaded gearboxes against scuffing and micropitting. It provides an ideal lubricant film across wide temperature ranges and greatly extends drain intervals. Proven performance in lab testing and field trials. (SKU 0950)

No. 930 Series Industrial Gear Lubricants are formulated for high film strength and oxidation stability to excel under high loads and temperatures. No. 930 Series' extreme pressure protection prevents gear scuffing and micropitting for maximum drive life. (SKU 0930)

HYDRAULIC FLUID

- SYN-Nth Hydraulic Fluid provides maximized long life, performance and protection while increasing efficiency making it ideal for high-cycle, high-precision hydraulic systems. Factory filtered for a new oil ISO 4406 cleanliness of 16/14/11. (SKU 0255)
- OPAL™ resists foaming to prevent cavitation, extends hose and seal life relative to conventional oils and combats oxidation and varnish to prevent valve and solenoid sticking while ensuring long-term, smooth operation. (SKU 2500)
- Majestic™ Hydraulic Fluid is a reduced environmental impact fluid featuring ashless anti-wear additives to protect hydraulic systems, air compressors and paper machines. (SKU 0426)

GREASES

HyPlex™ maximizes protection of your electric motor and high-speed equipment bearings. This high-performance lithium complex grease is formulated to excel under conditions of high heat, high speed, vibration, and heavy loads. (SKU 0065)

Acculube™ lithium grease features a high weld load and high oxidation stability. Its ISO 320 base oil makes it an ideal multipurpose industrial grease for bearings and equipment. (SKU 0055)

Hydro-Syn™ 70 offers premium protection for severely loaded equipment operating under conditions of extreme temperature, vibration, moisture, and shock loads. It is tackified to exclude contaminants while ensuring stay-in-place performance. (SKU 0070)

COMPRESSOR AND BLOWER OILS

- Ultra-Kleen™ XPL Pure Air** is a premium air compressor oil offering superior wear protection and deposit formation resistance for rotary screw, rotary vane, and centrifugal air compressors. (SKU 5740)

Energy Saving Hydrosynthetic® Blower Oil improves both the mechanical and cooling efficiency of rotary lobe blowers to reduce wear and save energy. (SKU 2251)

SPECIAL APPLICATIONS

No. 528 High Speed Chain, Wire Rope & Cable Lubricant provides comprehensive protection for multiple types of drive chains. This robust thickened and tackified lubricant seals out moisture and contamination while lubricating internal chain contact points with Molybdenum Disulfide for heavy duty protection. (SKU 0528)

- Clean Start Industrial Flush** neutralizes harmful acidic residue and dissolves deposits in industrial oil-lubricated systems. Flushing before oil changes extends drain intervals, protects equipment, and optimizes performance. (SKU 0079)
- No. 604 Ultra-Kleen Food Grade Chain and Cable Lubricant** is thickened and tackified to prevent drippage, sling-off, and water wash-off. Formulated with environmentally friendly Hexagonal Boron Nitride, for extreme pressure protection against wear. (SKU 0604)

ULTRA-KLEEN™ FOOD GRADE LUBRICANTS

- Hydrotex offers an extensive line of food grade lubricants for use in the production of sanitary containers and food packaging materials. Ultra-Kleen Food Grade Lubricants feature high purity, non-toxic base oils and engineered additives to ensure optimum equipment performance while meeting or exceeding the safety guidelines of the food industry.

The Ultra-Kleen product family includes a full line of food grade lubricants covering a wide range of applications including hydraulic and pneumatic systems, compressors, gearboxes, chains, and bearings. Our NSF registered ISO 21469 certified lubricants keep your operation running smoothly

The Lubricants for a Healthier Planet™ product line is designed to improve worker and consumer safety, prevent harm to the environment and support sustainable processes. To be considered a Lubricant for a Healthier Planet, each product must possess one or more of the following attributes:

Minimally Toxic

Resource Conserving

Bio-Responsible
